

Europal – Teamleader technical service (day)

Teamleader technical service (day)

We are Europal, a leading player in the packaging industry, based in Kortrijk, with production sites in Blandain and Mouscron.

With a strong focus on quality and innovation, we strive for sustainable solutions for our customers. To strengthen our team, we are looking for a driven Technical Service Team Leader.

Role:

As a Technical Service Team Leader, you are responsible for coordinating and leading our technical team. You ensure efficient execution of maintenance tasks and technical projects, with a focus on quality and safety.

Tasks and responsibilities:

- **Leading the technical team:** Coaching, motivating, and developing team members to ensure optimal performance.
- **Planning and coordination:** Creating and following up on maintenance plans and ensuring timely execution of technical projects.
- **Problem-solving:** Analyzing and resolving complex technical issues to ensure the continuity of the production process.
- **Quality control:** Ensuring compliance with quality standards and safety regulations within the technical service.
- **Communication:** Acting as a link between the technical team and other departments to ensure smooth collaboration.

Why are you our new Power Player?

- With your degree in a technical field, plus your years of experience (3-5) in a similar role, you will immediately impress us.
- A technical environment holds no secrets for you, as you already have experience in a leadership role in such an environment.
- As a Technical Service Team Leader, you have a thorough knowledge of mechanics, electricity, electrical engineering, electromechanics, and electronics.
- Fires are there to be extinguished, so you quickly turn problems into opportunities. This is thanks to your strong problem-solving skills and proactive attitude.
- You are in daily contact with various parties, so you are described as someone very communicative with a strong team spirit.
- Knowledge of QHSE regulations is a plus.

What's in it for you?

- In our dynamic family business, you can make a difference and see the impact. The short lines of communication and flat consultation structure make this a reality.

- 'One team' is the common thread throughout our activities.
- 'Sustainability' is embedded in everything we do, and we are driven to provide the best customer journey with a package of total solutions. We achieve this only with our Power Players (like you soon) on board.
- It sounds cliché, but we offer a competitive salary package after mapping out your wishes and desires. Think of group insurance, meal vouchers, ...
- We expect flexibility, but conversely, it is only fair that we are too. With us, you can have flexible hours and work from home one day a week.
- We are an innovative company that continues to grow, and our site in Blandain will demonstrate that.
- With some pride, we can promise that we offer 4 hours of training per person per month, and we haven't even mentioned our Europal Academy, which will soon become the jewel of our company.
- A challenging role in a growing and innovative company.
- A warm and inclusive work environment where teamwork is central.
