

## Europal – Technician

### Technician

As a Technician, you are responsible for maintaining, repairing and improving our industrial equipment, machinery and technical systems. Your expertise ensures maximum machine availability and keeps our production running efficiently.

#### Job description

As a Technician, your responsibilities include:

- Ensuring maximum availability of production equipment.
- Repairing or replacing defective machine components.
- Preparing technical intervention reports and recording maintenance activities in the Computerised Maintenance Management System (CMMS).
- Contributing to the continuous improvement of maintenance procedures.
- Implementing technical improvements to increase machine performance, efficiency and lifespan.

### Why are you our new Power Player?

- You have qualifications or experience in mechanics, electrical engineering, electromechanics, electronics or a related technical field.
- You can read technical drawings, diagrams and manuals, including documentation in English.
- You work accurately and document maintenance interventions correctly.
- You are comfortable using computers and maintenance management software.
- You are analytical, proactive and methodical in your work.
- You enjoy learning and continuously updating your technical knowledge.
- You can work well under pressure and are willing to work in shifts.

### What's in it for you?

At Europal, you'll join an innovative manufacturing company where teamwork and entrepreneurship are at the heart of everything we do.

We offer:

- Impact: work in a small team with short communication lines where your contribution makes a real difference.
- Development: an average of four hours of training each month through our Europal Academy.
- Innovative environment: our production site in Blandain is continuously evolving and investing in new technologies.

- A competitive salary package with attractive fringe benefits tailored to your experience and commitment.
