

Europal – Technical Manager

Technics & Project Manager

The Technical Manager has overall responsibility for the technical management, reliability and further development of the machinery fleet and technical facilities at DC06 and DC04. He/She leads the entire technical team and ensures uptime, budget control and the successful implementation of technical projects.

Why are you our new Power Player?

Job description:

Technical management and maintenance:

- Prepare, manage and monitor the maintenance budget (OPEX & CAPEX)
- Develop, manage and follow up maintenance standards, procedures and work instructions
- Structure, plan and optimise preventive and corrective maintenance through CMMS
- Ensure machine safety, reliability and lifetime
- Analyse technical breakdowns and initiate structural improvement actions

Technical and technological project management

Leadership:

- Lead and manage the technical team across the two production sites

Risk management and regulatory compliance

Innovation and continuous improvement

Close collaboration with Production, QHSE, R&D and Supply Chain

Knowledge and skills:

- Master's degree in engineering or equivalent through experience
- Minimum 5 years of experience in technical management within an industrial environment
- Proven experience in technical project management and subcontractor management
- Knowledge of maintenance systems (CMMS), machine safety and industrial installations
- Good command of French and English

What's in it for you?
